

WARRANTY/ORDER NUMBER

Find your warranty/order number on SoftLite windows

Your order number is your warranty number. If you do not have your warranty sheet with your order number written on it, you can find the number on your SoftLite windows. This is the number you enter when registering your products at www.soft-lite.com/product-registration. **You must register your windows within sixty (60) days of shipment to validate your warranty.**

On all operational models, the label with the order number is found in either the top or side frame pockets. Sashes must be opened in order to gain access to the label. Check all pockets as the labels can be found in different places. Please see examples below.

LABEL SAMPLE

Do not remove order labels from windows

For picture windows or shapes, the order number label is not accessible. Please take the number from an operable window. All windows in the same order will have the identical number. If you did not purchase an operable window, please contact the dealer where you purchased your windows to obtain your warranty number.
